

Magnacoustics MagnaLink™ Headset System

Features & Benefits

- Magnacoustics' MagnaLink™ / MagnaPlug™ Pneumatic Stethoscope Headset Hearing Protection System provides 30dB of attenuation.
- Surpasses GE Healthcare hearing protection requirements of 29dB or greater.
- Easy fit. Simply roll up and insert like regular foam ear plugs.
- Articulating MagnaLink™ connectors adjust for all patients.
- Yoke provides a small amount of tension to maintain connection.
- Enhances patient comfort by significantly reducing the gradient noise to the patient.
- Enhances Technologist to patient communication.
- Enhances Auto Voice instructions for breath-hold studies.
- The MagnaPlug™ and MagnaPlug Mini™ are disposable, eliminating sanitary concerns.

Compatibility

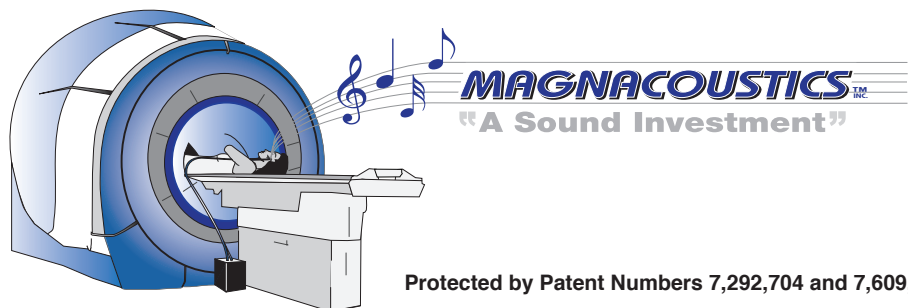

- The ONLY patented headset to meet GE Healthcare hearing protection requirements and fit ALL coils.
- 100% compatible with ALL MRI systems.

Specifications

- Latex-Free beige polymer.
- 30dB of attenuation NNR tested to ANSI standard.
